Discussed at Boosters Club
Last Evening and
Steps Taken

TOWARDS A GLOVE FACTORY

The Boosters held a live wire meeting last evening at the City Hall. Quite a number were present and took part in the discussion. The most important matter brought before the Club was the reading of a letter from the Work Glove Co., of Detroit, Mich., who stated that they were going to open another branch factory and asked what the Boosters Club could offer them. They further stated that they would employ from 40 to 75 girls, and that they were also in communication with other towns.

This would be a great thing for our city if this company can be induced to locate here, as they would give employment to a class of labor that has no market here unless some business of this character should be established. This would mean many hundreds of dollars to be put into circulation weekly among our business men. The Secretary was instructed to write them asking what inducements they required as well as calling their attention to our unsurpassed facilities as regards fuel, water, power, labor, exemption from taxation, etc.

The question of the payment of dues was then discussed, and as many who gave their names for membership have never paid a cent of dues, or attended the meetings, it was decided to call their attention to this matter through the columns of the Bee. It was further agreed that all who do not attend or pay by the next meeting night, shall be dropped from the roll. The idea is to get the membership to attend. No good can be done unless the people are interested. One or two men cannot bring these manufacturing to our city, it takes cooperation and sticking to it. All are invited whether members or not. The idea is to get the people out to the meeting, so they shall know what is going on and give their support.

The question of cooperation was thoroughly discussed, with Miller & Oldham's meal as an object lesson. All the groceries but one carry this meal in stock, and if people will call for it every time in ordering meal, all the stores will carry no other brands. This will make prices lower on produce, etc., from the fact that the farmers will bring their produce when they bring a turn of corn to mill, as well as bringing trade to our local merchants.

The question of the thoughtlessness of the people in ordering groceries late in the afternoon, thereby causing much discomfort and weariness to the delivery boys and horses, was brought forward. Madisonville merchants cease delivering at

The Water Defenses

There is one phase of American preparedness which is palpable, pressing and decisive. Nature, which has been most prodigal in its benefits to the United States, has not been niggardly in the responsibilities it imposes for their maintenance and protection.

Great European ports are protected by sheltering and defensive rivers from the sea. London on the Thames and Bremen on the Weser are fifty miles inland. Hamburg on the Elbe is 75. Bordeaux on the Garonne 60, and Antwerp on the Scheldt 52. Liverpool on the Mersey, Hull on the Humber, Glasgow on the Clyde and Rotterdam on the Maas have, all of them, shore protection, and the security of Constantinople has been shown in the toll of lives of the gallant men who sought to force the straits protecting it.

Three great American ports, the three greatest in respect to their importance to commerce, New York, Boston and San Francisco, are on the sea. Two of the five boroughs of New York City have shore front on the Atlantic. Two other boroughs, Manhattan and Richmond, are well within the range of naval guns. The Bronx is open to the Long Island Sound. In five hours' bombardment the material damage to New York, Boston or San Francisco would amount, perhaps, into billions, and without the possibility of protection, except through adequate defense.

Nature, which protects the ports of European countries, leaves to the prescience and patriotism of men, the safeguarding of the three great tidewater ports of the United States.—Wall Street Journal.

Here's hoping Earlington will mop up with both teams, and return home with the wreath of laurel adorning their brow.

CLEANSER YOUR HAIR MAKES IT BEAUTIFUL THICK, GLOSSY, WAVY

Try this! All dandruff disappears and hair stops coming out

Surely try a "Danderine Hair Cleanser" if you wish to immediately doubt the beauty of your hair. Just moisten a cloth with Danderine and draw it carefully through your hair, taking one small strand at a time; this will cleanse the hair of dust, dirt or any excessive oil—in a few minutes you will be amazed. Your hair will be wavy, fluffy and abundant and possess an incomparable softness, lustre and luxuriance.

Besides beautifying the hair, one application of Danderine dissolves every particle of dandruff; invigorates the scalp, stopping itching and falling hair.

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

You can surely have pretty, soft, lustrous hair, and lots of it, if you will just get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter and try it as directed.

Peck's Bad Boy

—FEB. 1—

Our exchanges have nothing but praise for "Peck's Bad Boy" which will be seen at Temple Theatre on the above date. This popular comedy is improved in every way and thoroughly up-to-date. There's the same mischievous Bad Boy, Henry Peck; his chum, Jimmy Duffy, and his girl, Minnie and the old German grocer, Shultz, burnished up and as bright as a new dollar. Clever specialties are introduced and a most pleasant evening's entertainment is a foregone conclusion.

Bully For Muhlenberg

(Courier-Journal.)

The conviction of three men at Greenville, who were indicted for a "possum hunter" outrage, is a victory of law and order, which was not won without courage and perseverance, and for which Muhlenberg county should be grateful. The citizens of Muhlenberg who took part in, or were serviceable to, the prosecution proved the excellence of their citizenship as well as the quality of their mettle. Let credit be given where credit is due.

One conviction where the crime was committed as a result of organization and because of confidence in immunity, goes a long way toward discouraging outlawry not only in the county in which the conviction occurs, but also in the section of which it is a part.

Muhlenberg not only sets her house in order, but also sets a rattling good example, when she sends "possum hunters" to prison for having participated in a cowardly act of violence. There are numerous cases still to be tried. It is to be hoped that good fortune will attend the efforts of the prosecution in the cases upon the docket. Every guilty man should be punished. There should be no disposition to find cause for satisfaction in the successful prosecution of one case.
